

Transportation Task Force Anti-Racism Efforts
Updated and Agreed to January 2021

Principles

We acknowledge that the country's transportation systems have been shaped by racist policies and attitudes, so we will learn about, incorporate, and pursue anti-racism in our policy agendas and Task Force work.

We will seek equity in transportation policymaking. We will pursue policies that create affordable, quality transportation options for all people with disabilities, regardless of race, ethnicity, gender, sexual orientation, or geography. We will consider the intersection of policing, housing and community development, poverty alleviation, employment, and healthcare policies on transportation equity.

We will listen to diverse voices. We will invite speakers with knowledge of mobility justice issues and the intersectionality of race and disability to inform our task force discussions and decisions; we will follow research that examines the impact of transportation decisions and equity initiatives on Black, Indigenous, and People of Color communities; and we will encourage our membership to elevate and include diverse voices as representatives to CCD.
